Profile

I'm a diligent and hard working student in my 4th year of Secondary school. I have thoroughly enjoyed my STEM subjects in school and exploring design and creation of apps through my Make It Happen charity work. I am looking to gain valuable work experience with a leading technology firm to learn and apply my talent in a work setting.

Interests

CODING I've loved learning coding through my school where I have learned Visual Basic and explored mobile app development using Thunkable and Glide. I like being able to solve problems and explore new ideas.	COOKING I enjoy cooking and earned my Food hygiene certificate allowing me to work in cafes and restaurants when they re-open after lockdown. As well as creating great food to eat I do enjoy following and adapting recipes in a kitchen.
ESPORTS During the pandemic lockdown I needed to find a new way to enjoy competitive sports and was able to pickup Fifa and Formula One online where I could collaborate with my friends learning great teamwork and communications skills while under pressure.	MUSIC I've taken my love of music to learn Piano to grade 2 and Drums to National 5. I enjoy reading music and being able to share some great music with others.

Experience

LEARN JPMORGAN – 2021

I wanted a fun way to learn more mobile app skills while also learning some facts about JPMorgan. I created this app to learn important people and places for JPMorgan.

MAKE IT HAPPEN – 2019-PRESENT

Make It Happen is a charity with the goal of inspiring children's digital learning through an innovative app design competition across many primary schools in Scotland. I have volunteered for this charity helping to judge entries and representing them at the Insp-Hire event.
